SIB70110 Vocational Graduate Certificate in Intense Pulsed Light and Laser Hair Reduction

This qualification reflects the role of individuals who apply substantial specialised knowledge and skills to design and safely apply non-ionising radiation treatments using intense pulsed light and laser technologies to reduce unwanted hair on the face and body.

In this role they make complex, high level, independent judgements in consulting with clients and analysing their skin and hair characteristics, designing and evaluating intense pulsed light and laser hair reduction treatment programs, selecting and using appropriate technology, and applying it within the context of safe client and operator practices and in compliance with regulatory requirements. Ongoing technological developments in this area of practice require the use of broad knowledge and the identification, analysis and evaluation of information from a variety of sources to build personal capability.

Practice may be undertaken in the hair reduction stream of the beauty industry or in other settings where cosmetic laser hair reduction services are offered.

Entry requirements

To enrol in the Vocational Graduate Certificate in Intense Pulsed Light and Laser Hair Reduction, individuals will need to meet the following entry requirements.

Diploma of Beauty Therapy or a relevant qualification at diploma level or above in medical health, including the study of human biology, anatomy and physiology; and significant and relevant vocational experience as a beauty therapist with a primary focus on providing facial services, skin services and hair reduction services; or evidence of significant and relevant vocational experience relating to the application of human biology, anatomy and physiology knowledge in their respective field.

Licensing, legislative, regulatory or certification considerations

The use of non-ionising radiation for cosmetic treatments is currently subject to licensing under the Queensland Radiation Safety Act 1999, and accreditation of equipment, premises and operator under the Tasmanian Radiation Protection Act 2005. The Western Australian Radiation Safety Act 1975 imposes conditions, limitations and restrictions on the use of Class 4 lasers. With regard to other states and territories, no licensing, regulatory or certification requirements apply at the time of endorsement.

Core units

HLTIN402B	Maintain infection control standards in office practice settings
SIBBHRS705A SIBBHRS706A	Apply intense pulsed light and laser safety protocols Design intense pulsed light and laser hair reduction treatment programs
SIBBHRS707A	Provide intense pulsed light and laser hair reduction treatments
SIBBRES702A	Investigate developments in cosmetic treatments using light or laser systems

Price and information available on request.
